[coal prep plant permits in Indiana.xls](#)

Hi Krista:

I found the Indiana listing in the document and have been able to determine which NPDES permits are applicable to all but 2 of them, but the listing says that those 2 facilities are idle. Those are the ones listed as being owned by Lexington Coal Holdings. I have compiled a listing of permit numbers with locational information from ICIS. These permit approval documents should also be available in VFC. Let me know if I can be of further assistance.

Sincerely,

Catherine Hess

**Subject:** coal prep plants in IN

Hi Catherine,

Triggered by the recent spill in WV, our RA is interested in knowing the location of coal prep plants in Region 5.

I'm trying to put together a map of where coal preparation plants are located in Region 5. Since IN uses the general permit for coal facilities, including prep plants, I don't have a lot to go on in terms of locating prep plants in IN. We found a list compiled by industry of prep plants by state, see the link below, but it does not contain locational information.

Would you or someone in your office be able to help locate the prep plants identified by the industry in the link below? Or, if you have another database that I could search to locate these facilities, if you could point me to that I would greatly appreciate it.

Thank you in advance for your help,

Krista
